Education

Dayananda Sagar College of Engineering — Bangalore, India
Master of Technology in Computer Science & Engineering — *2025 – 2027*

Dayananda Sagar University — Bangalore, India
Bachelor of Technology in Computer Science & Engineering — *2022 – 2025*

Oxford Polytechnic — Bangalore, India
Diploma in Computer Science & Engineering — *2019 – 2022*

Experience

Frontend Developer Intern — Aug. 2026 – Present
Thundertribes — *Remote, Bangalore*

- Building and maintaining responsive front-end interfaces for web applications in a remote team

Front-end Web Developer / Game Developer — Dec. 2024 – Present
Eklavya.Me — *Remote*

- Built and shipped **100+ educational web games** for young learners (counting, addition, multiplication, division, decimals, prime numbers, number comparison, letter tracing) using **Phaser**, **React**, **TypeScript** and **Vite**
- Integrated each game with a shared game shell SDK handling title screens, timers, pause/mute/reset and level flow, following a reusable component-based architecture
- Wrote unit tests with **Vitest**, enforced code quality with **ESLint**, and automated deployments with a **GitHub Actions** CI/CD pipeline
- Led a team of game development interns, coordinating tasks and guiding implementation

Projects

E-Commerce Store | *Next.js 15, React, Stripe API, Stripe Checkout, Context API, Vercel* — Live Demo | GitHub

- Built a full stack e-commerce web application with the Next.js App Router, with server-side API routes that fetch products and prices from the Stripe API and create secure Stripe Checkout sessions
- Managed cart state with the React Context API and rendered a dynamic product catalog from Stripe
- Deployed to Vercel with continuous deployment from GitHub; upgraded Next.js to patch security vulnerabilities

Subscription Tracker | *Next.js, React, Firebase Authentication, Cloud Firestore, Vercel* — Live Demo | GitHub

- Built a SaaS-style subscription tracking and analytics dashboard with email/password authentication and CRUD operations on a Firestore NoSQL database
- Calculated spending analytics such as monthly and yearly cost and days until next charge; secured per-user data with Firestore Security Rules

Wheel of Suffering | *React.js, React Hooks, Vite, Web Audio API, localStorage* — Live Demo | GitHub

- Built a home workout SPA with a customisable SVG wheel that picks a random exercise, an interval timer that auto-spins each round, Web Audio sound effects and localStorage persistence

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, HTML5, CSS3
Frontend: React.js, Next.js 15 (App Router), Redux Toolkit, React Hooks, Context API, Tailwind CSS, Vite, Single-Page Applications (SPA), Responsive & Mobile-First Design, UI/UX Design, Figma
Game Development: Phaser, HTML5 Canvas / WebGL, Game Scenes & Game Loops, Interactive Educational Games
Backend & Data: Firebase Authentication, Cloud Firestore (NoSQL), Firestore Security Rules, FastAPI, RESTful APIs, Next.js API Routes, CRUD Operations, Stripe Payments Integration, WordPress
Testing & DevOps: Vitest, Jest, React Testing Library, ESLint, CI/CD (GitHub Actions), Vercel, Netlify, Git, GitHub, Serverless Architecture
Core Concepts: Full Stack Web Development, SaaS Dashboards, Data Structures & Algorithms, SEO, Problem Solving, Team Leadership, Effective Communication
